ARCHITECTURE

Offices and working places are designed and constructed according to the structure and organisation of the work done in them. Globalisation and the continuing development in computer and communications technology have caused new job profiles to be created and old ones changed on a worldwide basis. This development is taken into account in workplace design and planning. These days working spaces have become more than ever a synthesis of design, available space and the constantly accelerating work processes. With almost 400 plans and photographs, this compendium presents a selection of projects in modern office architecture from all over the world. In addition it contains biographical details about the individual architects.

Fabio Fabbrizzi, who has edited the book, is himself an architect and he lives and works in Florence. His work mainly concerns building alteration, in particular interior architectural structure, as well as designing industrial buildings and buildings for trade and handicraft.

Büroräume werden bestimmt von der Struktur und Organisation der Arbeit, die in Ihnen geleistet wird. Globalisierung und die Weiterentwicklung der Computer- und Kommunikationstechnologie hat in der gesamten Welt zur Schaffung neuer und Änderung alter Berufsbilder geführt. Dieser Entwicklung wird auch bei der Planung und Gestaltung des Arbeitsplatzes Rechnung getragen. Büroräume sind mehr denn je eine Synthese von Design, vorgegebenem Raum und den sich immer schneller verändernden Arbeitsprozessen. In diesem Compendium werden dem Leser in fast 400 Fotografien und Plänen ausgewählte Projekte moderner Büroarchitektur aus aller Welt vorgestellt. Die bildlichen Darstellungen werden abgerundet durch biographische Informationen zu den Architekten.

Der Architekt Fabio Fabbrizzi, Herausgeber dieses Bandes, lebt und arbeitet in Florenz. Schwerpunkte seiner Tätigkeit sind die Umgestaltung von Gebäuden, vor allem ihrer innenarchitektonischen Strukturen, sowie die Planung von Industriebauten und Gebäuden für Handel und Kunsthandwerk.
